

Simplify and automate the disposal of excavated material and other waste. Ensure compliance and optimise your operations.

Quick, automated form filling

Integrate with other stakeholder platforms

Store information and forms
for analysis and comparative checking.

Tag and track your whole fleet

Exportable reports

Receive alerts
if timings or mileage differ from expectation, and investigate immediately.

SOLUTION UBYSOL

Generate and upload waste tracking forms with one click, including on-site, using the Android / iOS app.

On-board sensors geolocate disposal vehicles and record additional data such as the physical lifting of a skip. Measure actual tonnage transported with the optional weight sensor.

- ▶ Analyse completed vehicle circuits,
- ▶ All data is held in secure cloud storage with full backup,
- ▶ Save time and ensure compliance.

Case study

Grand Paris Express – Lot T2A

The Grand Paris Express is the largest transport project in Europe, combining extensions and new lines for the Paris Metro. For this portion of the project, we were asked to monitor the safe and compliant disposal of 1.4 million tonnes of waste material.
